

Tarea: App "Password Purr"

Alumno: Lisset Serrano Aguilar

The image displays two screenshots of the MIT App Inventor web interface, showing the development of a password application named "HelloPurrStarter".

Top Screenshot:

- Project Name:** HelloPurrStarter
- Screen:** Screen2
- Code Blocks:** A "when Button1.Click" block with a "do" block containing "call Sound1.Play".
- Components:** A "Button1" component is visible in the "Built-in" list on the left.

Bottom Screenshot:

- Project Name:** HelloPurrStarter
- Screen:** Screen1
- Code Blocks:** A "when Button1.Click" block with a "do" block containing an "if" statement. The "if" statement checks "PasswordTextBox1.Text" against "123". If true, it executes "open another screen screenName: Screen2". If false, it executes "set PasswordTextBox1.Text to """.
- Components:** A "Label1" component is visible in the "Built-in" list on the left.
